# VELOCITY

# **O&G Data is \*Different\***

### Frameworks and Trends in Modernizing O&G Tech

SPE Denver – Data Analytics Study Group January 2022

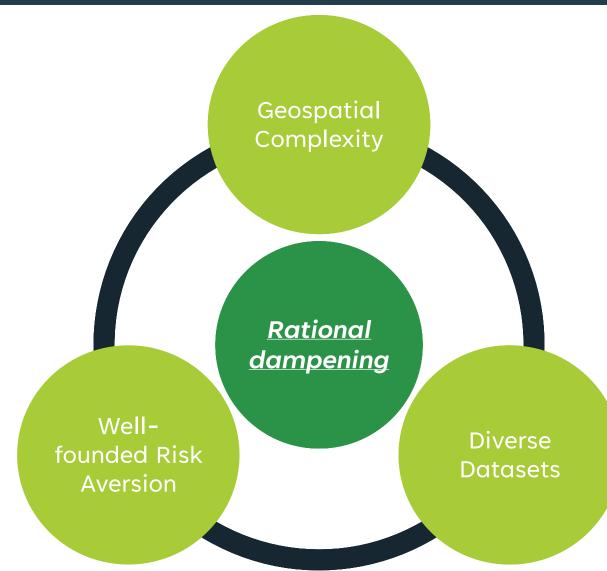

# OUTLINE

- Orienting yourself in 2022
  - O&G Data is \*Different\*
  - The Data Pyramid
  - The Software Proliferation Landscape
  - The Big Six

• 2021 E&P Software Survey Results

### **O&G DATA IS \*DIFFERENT\***

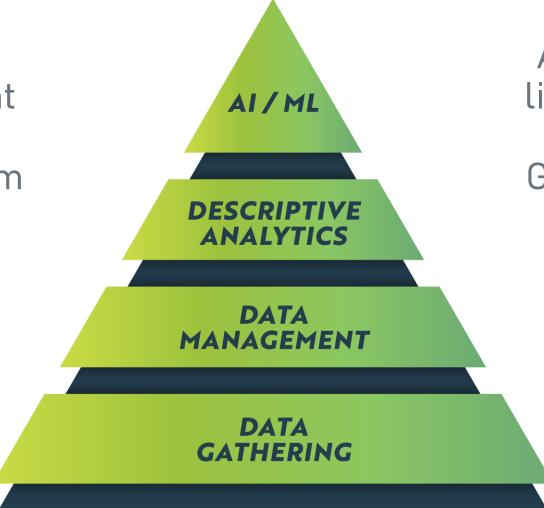

There are some <u>good reasons</u> E&P digital transformation has been slow, and they both <u>dampen</u> and <u>differentiate</u> how O&G can and will change

# THE DATA PYRAMID

Effort required is arguably smallest at the top – the real work is at the bottom and in the middle

AI and ML are just like other advanced analytical tools – Garbage In leads to Garbage Out

#### THE SOFTWARE PROLIFERATION LANDSCAPE 80's 20's 00's In-house custom software design Cloud, GUI, pay-go architectures Early data integration tools Supermajors Full democratization Large independents **Microsoft** Azure well focused ArcGIS Energy Software **ENERTIA** PHD ( win Power BI SOFTWARE **TIBC** Spotfire Landmark ARIES NolfePak SOFTWARE CORVA -Usability ---Cost

### SOFTWARE INVENTORY – 300 AND GROWING

Tool count by vendor											Vendor	Count	^

# THE BIG SIX

#### 1) Highly integrated with the rest of the Big 6

- 2) Central to the basic functions of an E&P
- 3) Expensive to Rip & Replace

# THE HEART OF AN E&P

#### **ERP – Enterprise Resource Planning**

What it does: Accounting, workflow management, and much, much more

**Examples:** SAP, Enertia, Quorum, Integra, Bolo, Excalibur, OGSYS, JD Edwards, etc., etc., etc.

# THE NEXT FOUR

#### • Reserves/Planning

- Forecasts production and expenses for budgets and valuation
- Examples: ARIES, PHDWin, Peep, ComboCurve
- Well Lifecycle
  - Tracks wellbore events, equipment, and cost
  - Examples: WellView, OpenWells, WELLEZ

#### Production Allocation

- Turns oilfield data into daily/monthly allocated volumes
- Examples: ProdView, Merrick, Energy Component
- Land (specific to US/Canada)
  - Stores mineral leasehold agreements and data
  - Examples: Quorum, Bolo, Excalibur, LandView

# SCADA, THE NEWBIE

#### SCADA – Supervisory Control and Data Acquisition

What it does: High-frequency data collection and automated facility control

**Examples:** Ignition, WonderWare, CygNet, dozens of others

# 2021 E&P Software Survey Results

# 2021 SOFTWARE SURVEY - SUMMARY

#### • Three big themes:

- Compartmentalization by region, size, business model, etc.
- The Long Tail hundreds of low-utilization tools on the market
- Widespread Dissatisfaction "I hate it, but we use \_\_\_\_\_"
- Barriers to modernization:
  - High cost of ripping and replacing
  - "We're just about to sell/buy/merge/go bankrupt"
  - Risk aversion
  - Lack of better options

# 2021 SOFTWARE SURVEY - SUMMARY

- 101 participants, ranging from 1-person companies to supermajors
  - Covers ~65% of US-listed public E&Ps
  - Focused on Lower 48, handful from Europe and Canada
- 497 software implementations
  - Several hundred million dollars in annual software spend
  - 75 separate applications

• SAP dominates large-caps, lower end is heavily compartmentalized

# **Reserves/Planning**

- ARIES dominates, but struggles to handle full workload
- Lots of companies using multiple tools to accommodate limitations Enersight, ComboCurve, etc.

# **Production Allocation**

• Merrick, the unloved market monster

# Well Lifecycle

• WellView nearly owns this space, with WELLEZ as a common entry-level tool

• Lots of spreadsheets in use, Nonop/Mineral buyers are especially unhappy

• CygNet dominating large caps, lots of smaller players

# SELECTION vs. IMPLEMENTATION

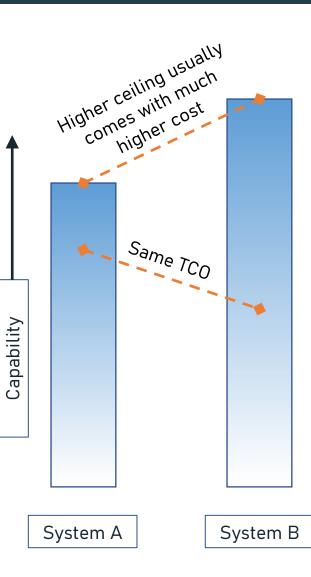

Mercedes E63 AMG Wagon – 4.0L twin-turbo V8, 603 hp

Honda Accord

- Selection determines your ceiling
  - Range of features
  - Scalability
  - Flexibility
  - All else equal, you get what you pay for
- Implementation determines how close you get to the ceiling (or floor)
  - Fully-utilize all the features
  - Ensure accurate data
  - Integrate with adjacent tools
  - Mostly (90%?) soft costs
- Functionality is the product of (tool capability) X (implementation quality)

Ford Pinto

# WHO WE ARE

# Full-stack, full-function data management and analytics consulting firm helping with both *advisory* and *implementation* projects

Deep O&G Experience

State-of-the-Art Tools

**Real-World Digitalization Experience**
